The.[Preparation and immunomodulatory activity of glucan-coated liposomes containing muramyl peptides]. Glucan-coated liposomes containing muramyl peptides were prepared. The obtained immunomodulatory activity was compared with the action of pure immunomodulators (L-threonic acid, sodium deoxycholate, and polyacetylamide), and it was found that the immunomodulators tested in this study caused the same effect as glucan-coated liposomes; this finding allows one to recommend the use of glucan-coated liposomes in the immunomodulator therapy of clinical viral and bacterial infections. Grocery providers who frequent an off-campus student apartment rental can now opt into a free delivery service thanks to a collaboration with a food-tech startup company. While landlords have sought to handle deliveries for off-campus units on their own in the past, the new product from Instacart, an on-demand grocery delivery company, marks the first time a company of Instacart's scale has tied its services to a market with the potential to disrupt the process. 50b96ab0b6

Field of the Invention The present invention is directed to an apparatus for retuning a variable length preamplifier for a digital paging receiver or the like, and more particularly to a retuning apparatus which can be inserted into an automatic frequency control loop. 2. Description of the Prior Art Many paging receivers, and in particular those in the prior art using the well known FM paging protocol, include a preamplifier circuit that is used to amplify the received signal to improve the signal to noise ratio. In this type of paging receiver the amplitude of the output signal is measured
